ROBOTICS SKILL DATA COLLECTION AND REVENUE SHARING AGREEMENT

StarForge Robotics LLC

WeWork Brickell City Centre

78 SW 7th Street

Miami, FL 33130, United States

Partner: [Partner Legal Name]

Effective Date: [Effective Date]

CONFIDENTIAL - COMMERCIAL DRAFT

This Robotics Skill Data Collection and Revenue Sharing Agreement (the "Agreement") is entered into as of [Effective Date] by and between:

StarForge Robotics LLC, having its principal business address at WeWork Brickell City Centre, 78 SW 7th Street, Miami, FL 33130, United States ("StarForge");

and

[Partner Legal Name], a company organized under the laws of [Jurisdiction], having its registered office at [Address] ("Partner").

StarForge and Partner may each be referred to as a "Party" and collectively as the "Parties".

1. Purpose

StarForge develops general-purpose robotic systems, cloud-based robotic intelligence, robot applications, data-collection hardware, and related artificial-intelligence infrastructure. Partner has expertise, personnel, facilities, or operational access suitable for collecting physical-world demonstrations and skill data within one or more defined industries or use cases.

The Parties wish to collaborate whereby:

- Partner collects Skill Data using equipment and data-collection systems provided or approved by StarForge;
- StarForge may use such Skill Data to train, fine-tune, evaluate, or otherwise develop robotic models, skills, applications, and services;
- StarForge may deploy such skills and applications through StarForge robots and its cloud intelligence platform; and
- Partner receives a revenue share from qualifying inference revenue generated by deployed StarForge robots using applications developed from the applicable Skill Data.

2. Definitions

2.1 StarForge Equipment

"StarForge Equipment" means data-collection equipment supplied or approved by StarForge, including without limitation egocentric video glasses, tactile gloves, force or pressure sensors, inertial sensors, cameras, associated computing devices, firmware, software, and data-capture systems.

2.2 Skill Data

"Skill Data" means data collected pursuant to this Agreement relating to performance of physical tasks, including egocentric video, hand and finger movement, tactile information, force and pressure information,

contact information, slip information, pose information, movement trajectories, task descriptions, language annotations, environmental observations, metadata, and other sensor or demonstration data specified by StarForge.

2.3 Skill Domain

"Skill Domain" means the particular category of tasks or use cases assigned to Partner under an applicable Statement of Work ("SOW"). Examples may include warehouse operations, home operations, hospitality, manufacturing, retail, healthcare, construction, agriculture, or other sectors agreed by the Parties.

2.4 Accepted Skill Dataset

"Accepted Skill Dataset" means Skill Data submitted by Partner and accepted by StarForge as meeting the applicable technical, quality, compliance, and usability standards.

2.5 Skill Application

"Skill Application" means a robotic skill, application, policy, model capability, workflow, or combination thereof developed by StarForge using, in whole or in material part, an Accepted Skill Dataset.

2.6 Qualifying Deployment

"Qualifying Deployment" means deployment of a Skill Application on or through one or more StarForge robots for which customers pay usage-based inference charges.

2.7 Inference Revenue

"Inference Revenue" means amounts actually received by StarForge from customers specifically for inference, execution, or usage of a Skill Application through deployed StarForge robotic systems or StarForge robotic intelligence infrastructure.

2.8 Attributable Net Inference Revenue

"Attributable Net Inference Revenue" means Inference Revenue actually received by StarForge that is directly attributable to the execution, use, or consumption of a Skill Application developed using, in whole or in material part, an Accepted Skill Dataset supplied by Partner, less only applicable taxes, refunds, chargebacks, payment-processing fees, credits, fraudulent transactions, and amounts not ultimately collected from customers.

For clarity, Attributable Net Inference Revenue does not include:

- fixed robot rental fees;
- robot hardware sales;
- maintenance fees;
- financing or leasing charges;
- installation fees;
- unrelated software or platform fees;
- revenue generated by applications unrelated to Partner's Skill Data; or
- any other non-inference revenue.

3. Scope of Collaboration

Partner shall collect Skill Data for the Skill Domains specified in one or more SOWs. Each SOW should identify, at minimum, the Skill Domain, tasks to be demonstrated, expected data volume, required sensors, collection methodology, quality requirements, target delivery dates, location of data collection, and any additional commercial terms.

No Skill Domain shall be deemed assigned exclusively to Partner unless exclusivity is expressly stated in the applicable SOW. StarForge may work with other data-collection partners within the same or similar Skill Domains unless otherwise agreed in writing.

4. Data Collection Requirements

Partner shall perform data collection professionally and in accordance with specifications provided by StarForge. Partner shall ensure that individuals participating in demonstrations are appropriately trained to use StarForge Equipment.

Partner shall use commercially reasonable efforts to ensure that Skill Data is accurate, synchronized, complete, representative of the relevant task, properly labeled where required, collected using approved procedures, and free from intentional manipulation or falsification.

StarForge may reject data that fails to satisfy its technical or quality requirements. Revenue-sharing rights shall arise only with respect to Accepted Skill Datasets unless otherwise agreed in writing.

5. StarForge Equipment

StarForge may provide Partner with StarForge Equipment for purposes of performing this Agreement. Unless expressly sold to Partner in writing, all StarForge Equipment shall remain the exclusive property of StarForge.

Partner shall:

- use the equipment solely for authorized data collection;
- maintain the equipment in reasonable condition;
- not reverse engineer, modify, dismantle, reproduce, or copy the equipment except as expressly authorized;
- not provide the equipment to unauthorized third parties;
- promptly notify StarForge of damage, theft, loss, or malfunction; and
- return equipment upon termination or StarForge's reasonable request.

6. Ownership of Skill Data

Subject to applicable law and required rights from data subjects, all Skill Data specifically collected for StarForge pursuant to this Agreement shall be owned by StarForge upon creation and delivery. Partner hereby assigns to StarForge all transferable rights, title, and interest in such Skill Data.

StarForge may use the Skill Data for purposes including training artificial-intelligence models, fine-tuning models, reinforcement learning, simulation, evaluation, benchmarking, robot application development, commercial deployment, synthetic-data generation, derivative dataset creation, model improvement, and research and development. StarForge may combine Skill Data with other datasets.

Partner retains ownership of intellectual property independently developed by Partner before this Agreement and not created specifically for StarForge ("Background IP").

7. Model and Application Ownership

All models, neural-network weights, robot policies, applications, software, algorithms, architectures, training pipelines, derived datasets, model outputs, improvements, and other technology developed by or for StarForge using Skill Data shall remain the exclusive property of StarForge.

Partner's economic participation in a Skill Application shall arise through the revenue-sharing rights described in this Agreement and shall not confer ownership of StarForge models, robot software, cloud infrastructure, model weights, APIs, robotic systems, or other StarForge intellectual property.

8. Revenue Sharing

For each Qualifying Deployment of a Skill Application developed using, in whole or in material part, Partner's Accepted Skill Dataset, Partner shall be entitled to seventy percent (70%) of the Attributable Net Inference Revenue generated by that Skill Application.

The foregoing revenue share applies only to inference revenue attributable to the relevant Skill Application and does not apply to fixed robot rental revenue, hardware revenue, maintenance revenue, financing revenue, unrelated software revenue, or other non-inference revenue generated by the robot.

9. Domain-Specific Revenue Attribution

Revenue-sharing rights shall be linked to the Skill Applications developed from Partner's Accepted Skill Data and not merely to the presence of Partner data anywhere within StarForge's general-purpose models.

For example, where Partner collects warehouse Skill Data that is used to develop a warehouse Skill Application, Partner shall receive seventy percent (70%) of Attributable Net Inference Revenue generated from use of that warehouse Skill Application on deployed StarForge robots. Likewise, where Partner collects home Skill Data that is used to develop a home Skill Application, Partner shall receive seventy percent (70%) of Attributable Net Inference Revenue generated from use of that home Skill Application.

10. Applications Using Multiple Datasets

A Skill Application may incorporate data supplied by more than one partner. Before commercial deployment of such application, StarForge shall maintain an attribution record identifying the applicable revenue allocation among participating datasets or partners.

Where practicable, attribution may take into account the relative contribution of datasets, tasks enabled, volume of accepted demonstrations, uniqueness of collected skills, performance contribution, and other objectively relevant factors. The applicable Partner percentage shall be applied to the portion of Attributable Net Inference Revenue attributed to that Partner.

StarForge shall not intentionally structure, rename, repackage, or reclassify an application for the primary purpose of avoiding a Partner's legitimate revenue-sharing entitlement.

11. Revenue Statements and Payments

StarForge shall calculate Partner's revenue share on a monthly basis. Within thirty (30) days following the end of each calendar month in which revenue is payable, StarForge shall provide Partner with a statement reasonably showing the applicable Skill Application, qualifying deployment activity, Attributable Net Inference Revenue, applicable deductions, Partner's revenue-share percentage, and amount payable.

Payments shall be made in United States dollars unless otherwise agreed in writing. Amounts below USD 100 may be carried forward to the following payment period.

12. Records and Audit

StarForge shall maintain records reasonably sufficient to calculate amounts payable to Partner. No more than once in any twelve-month period, Partner may request an independent audit relating solely to revenue attributable to Partner under this Agreement.

Any such audit shall be conducted by an independent professional bound by confidentiality, occur during reasonable business hours, not provide Partner access to confidential information relating to unrelated customers, partners, models, or applications, and be conducted at Partner's expense. If an audit identifies an underpayment exceeding five percent (5%) for the period audited, StarForge shall reimburse the reasonable audit cost in addition to paying the identified shortfall.

13. No Guaranteed Revenue

Partner acknowledges that acceptance of Skill Data does not guarantee commercial deployment; development of a Skill Application does not guarantee customer adoption; StarForge does not guarantee any minimum number of robots, inference usage, or revenue; and revenue share becomes payable only when qualifying Attributable Net Inference Revenue is actually received by StarForge.

14. Customer Pricing

Unless otherwise agreed, StarForge shall retain discretion regarding inference pricing, customer packaging, robot pricing, subscription structure, usage metering, discounts, promotions, cloud architecture, and commercialization strategy. StarForge shall exercise such discretion in good faith and shall not artificially reclassify substantially all inference revenue for the primary purpose of avoiding Partner revenue share.

15. Intellectual Property

Each Party retains ownership of intellectual property existing before the Effective Date. Nothing in this Agreement transfers ownership of StarForge's robotic hardware, tactile glove technology, egocentric glasses technology, patents, patent applications, models, APIs, cloud infrastructure, robot architecture, firmware, or software.

Partner shall not file or assist another party in filing intellectual-property claims based primarily upon confidential StarForge technology disclosed through the collaboration. Nothing herein prevents Partner from developing unrelated technology independently without use of StarForge Confidential Information.

16. Personnel and Data-Subject Rights

Partner shall obtain all permissions, releases, consents, employment authorizations, and other rights necessary for lawful collection and transfer of Skill Data. Where Skill Data includes identifiable individuals, Partner shall ensure that StarForge has sufficient rights to receive, store, process, use, and commercially exploit such data for AI training, derived information, trained models, and resulting robot applications.

Partner shall comply with applicable privacy, employment, biometric-data, surveillance, and data-protection laws. StarForge may require participants to execute additional consent or release documentation.

17. Confidentiality

Each Party may receive confidential information relating to the other Party. "Confidential Information" includes unreleased robot technology, hardware designs, model architecture, training methods, source code, datasets, customer information, pricing, deployment plans, business strategies, and technical documentation.

The receiving Party shall use Confidential Information solely for purposes of this Agreement, protect it using reasonable security measures, and not disclose it except to personnel who need access and are subject to confidentiality obligations. These obligations shall survive termination for five (5) years, except for trade secrets, which shall remain protected for so long as they constitute trade secrets under applicable law.

18. Restrictions

Partner shall not, without StarForge's prior written consent:

- train competing robot models using StarForge Confidential Information;
- copy or reverse engineer StarForge hardware or software;
- circumvent equipment security measures;
- extract proprietary firmware;
- commercialize StarForge Skill Data independently;
- resell or sublicense StarForge Equipment;
- represent itself as owning StarForge technology; or
- provide StarForge confidential technology to a competitor.

Nothing in this Section prevents Partner from performing unrelated data-collection activities using independently developed systems and information.

19. Quality and Performance

StarForge may issue reasonable technical standards relating to Skill Data quality, including sensor calibration, synchronization, frame rate, tactile sampling frequency, demonstration completeness, camera placement, force measurement, metadata requirements, task success criteria, and annotation quality. Repeated delivery of materially defective data may constitute a breach of this Agreement.

20. Representations and Warranties

Each Party represents that it has authority to enter into this Agreement, entering into this Agreement does not knowingly violate another binding agreement, and it will comply with applicable law. Partner further represents

that it has obtained all necessary rights to provide Skill Data to StarForge. StarForge does not warrant that any particular Skill Data will result in a commercially successful Skill Application.

21. Indemnification

Partner shall indemnify, defend, and hold harmless StarForge and its affiliates, officers, employees, and agents from third-party claims arising from Partner's unlawful collection of data, absence of required participant consent, Partner's material violation of applicable law, Partner's misuse of StarForge Equipment, or Partner's infringement of third-party rights through materials independently supplied by Partner.

StarForge shall indemnify Partner against third-party claims alleging that StarForge technology supplied by StarForge and used as expressly authorized under this Agreement infringes third-party intellectual-property rights, subject to customary exclusions for modifications, combinations not supplied by StarForge, use outside the agreed scope, and continued use after notice of an alleged infringement where a reasonable workaround is offered.

22. Limitation of Liability

Except for fraud, willful misconduct, breach of confidentiality, misuse of intellectual property, indemnification obligations, amounts validly accrued and payable as Partner revenue share, or liabilities that cannot lawfully be limited, neither Party shall be liable to the other for indirect, incidental, punitive, special, or consequential damages.

The Parties may specify a general aggregate liability cap of [amount or fees/revenue paid during the preceding twelve (12) months] in the applicable SOW or by written amendment.

23. Term

This Agreement shall commence on the Effective Date and continue for an initial term of three (3) years, unless terminated earlier in accordance with this Agreement. Thereafter it shall automatically renew for successive one-year periods unless either Party provides ninety (90) days' written notice of non-renewal.

24. Termination

Either Party may terminate this Agreement for material breach that remains uncured for thirty (30) days following written notice; immediately in the case of fraud, intentional misuse of confidential technology, or serious unlawful conduct; or without cause upon ninety (90) days' prior written notice.

Termination shall not affect payment obligations accrued prior to termination and shall not, by itself, terminate Partner's continuing revenue-sharing rights under Section 25.

25. Continuing Revenue Share for Existing Applications

Partner's entitlement to the revenue share described in this Agreement shall not terminate merely because Partner ceases collecting additional Skill Data, completes its applicable SOW, ceases performing additional services for StarForge, or the broader commercial relationship between the Parties expires or otherwise ends.

For each Skill Application developed using, in whole or in material part, Partner's Accepted Skill Dataset, Partner shall continue to receive seventy percent (70%) of the Attributable Net Inference Revenue generated by such Skill Application for so long as that Skill Application remains deployed, available for commercial use, or otherwise generates Attributable Net Inference Revenue through StarForge robots or StarForge's robotic intelligence platform.

The obligations of StarForge to calculate, report, and pay such continuing revenue share shall survive expiration or termination of this Agreement.

Notwithstanding the foregoing, if Partner is terminated for fraud, intentional data falsification, theft or misappropriation of StarForge intellectual property, or another material breach that expressly permits forfeiture under an applicable SOW, the Parties may specify the resulting treatment of future revenue share in that SOW

or in a separate written settlement. In the absence of such express written provision, previously accrued payment obligations remain payable.

26. Application Continuity and Derivative Applications

Partner's revenue-sharing rights shall not cease solely because StarForge modifies, updates, improves, renames, repackages, versions, combines, or otherwise evolves a Skill Application.

Where Partner's Accepted Skill Dataset continues to make a material contribution to a deployed Skill Application, successor application, or derivative application, the applicable revenue attributable to such contribution shall remain subject to Partner's revenue-sharing rights under this Agreement.

StarForge shall not intentionally restructure, rename, reclassify, or package a Skill Application or associated inference charges for the primary purpose of avoiding or reducing Partner's revenue-sharing entitlement.

27. Independent Contractors

The Parties are independent contractors. Nothing in this Agreement creates employment, partnership, agency, franchise, joint venture, or fiduciary relationship between the Parties. Partner shall remain responsible for its personnel, contractors, taxes, employment obligations, and operational expenses unless otherwise stated in an SOW.

28. Publicity

Neither Party may use the other Party's trademarks or make public announcements regarding the relationship without prior written approval, except where disclosure is required by law. StarForge may identify Partner as an ecosystem or data-collection partner only with Partner's approval.

29. Governing Law and Dispute Resolution

This Agreement shall be governed by the laws of [Jurisdiction], without regard to conflict-of-laws principles. Any dispute arising from or relating to this Agreement shall be resolved through [courts/arbitration mechanism and location].

30. Assignment

Partner may not assign this Agreement or transfer its revenue-sharing rights without StarForge's prior written consent. StarForge may assign this Agreement in connection with a corporate restructuring, merger, acquisition, sale of substantially all relevant assets, or transfer to an Affiliate, provided the successor assumes StarForge's applicable obligations under this Agreement.

31. Notices

Any notice required under this Agreement shall be in writing and delivered by personal delivery, recognized courier, or email with confirmation of receipt to the addresses specified below or to any replacement address notified in writing.

Notices to StarForge: StarForge Robotics LLC, WeWork Brickell City Centre, 78 SW 7th Street, Miami, FL 33130, United States; Email: [StarForge legal email].

Notices to Partner: [Partner notice address and email].

32. Entire Agreement; Amendments; Severability

This Agreement together with its SOWs constitutes the entire agreement between the Parties concerning its subject matter and supersedes prior discussions relating thereto. Any amendment must be made in writing and signed by authorized representatives of both Parties. If any provision is held invalid or unenforceable, the remaining provisions shall remain in effect and the invalid provision shall be interpreted, where possible, to best reflect the original commercial intent.

33. Counterparts and Electronic Signatures

This Agreement may be executed in counterparts, each of which shall be deemed an original and all of which together shall constitute one instrument. Electronic signatures and signatures transmitted electronically shall have the same effect as original signatures to the extent permitted by applicable law.

34. Signatures

IN WITNESS WHEREOF, the Parties have caused this Agreement to be executed by their duly authorized representatives as of the Effective Date.

SCHEDULE A
SKILL DOMAIN STATEMENT OF WORK

This Schedule A is issued under the Robotics Skill Data Collection and Revenue Sharing Agreement between StarForge Robotics LLC and [Partner Legal Name].

Partner	[Partner Legal Name]
Skill Domain	[Warehouse / Home / Hospitality / Manufacturing / Other]
Tasks Covered	[Describe specific skills and task families]
Collection Location	[Location(s)]
Required Demonstrations	[Number / hours / episodes / other metric]
StarForge Equipment Provided	[Equipment list]
Technical Requirements	[Sensor, synchronization, labeling, quality and format requirements]
Expected Delivery Date	[Date]
Revenue Share	Partner: 70% of Attributable Net Inference Revenue
Revenue Share Duration	For so long as the relevant Skill Application remains deployed, available for commercial use, or otherwise generates Attributable Net Inference Revenue, subject to the Agreement.
Exclusivity	[Non-exclusive / Exclusive subject to conditions]
Additional Terms	[If any]

Illustrative Domain Attribution

Warehouse Skill Data -> Warehouse Skill Application -> Warehouse robot deployment -> Attributable Net Inference Revenue -> 70% Partner revenue share.

Home Skill Data -> Home Skill Application -> Home robot deployment -> Attributable Net Inference Revenue -> 70% Partner revenue share.

SOW Signatures
